FINAL INFORMATION

Relay

Course data

Category	Distance	Altitude	Controls
Men	5.1 – 5.3	220	16
Women	4.5 – 4.6 km	155	14

Terrain

Willbrig consists of a mostly flat plateau flanked at the edges by slopes that are steeper in places and crisscrossed by numerous ditches. The forest generally features many roads and trails that allow for a fast-running pace. Away from the trails, runnability is limited to varying degrees by the vegetation. Some areas are crisscrossed by numerous drainage ditches and water channels that are currently mostly dry. Large areas overgrown with blackberries are also characteristic of the terrain. Despite the dry and hot summer, the vegetation has grown vigorously. The thorns are in some places dense and waist-high, making it difficult to move forward in those areas.

Map

- The maps are rolled up and may not be opened until the start time. The first part of the course is on the inside. The race number is printed in the upper right corner. (Race number, Course number)
- The control descriptions are printed on the map. The control numbers are listed only on the control descriptions.
- Marked route to the start point: approx. 100 m
- Finish passage with map flip approx. 6 to 8 minutes before the finish. 60 m marked route to the start point
- Restricted areas (symbol 709) must not be entered. The roads and paths at the edge of the restricted areas may be used.
- Map symbol / control description symbol for each feature

- bench

Special information

There are no aid stations in the forest.

Sprint Course data

Category	Distance	Altitude	Controls
W18	3.1	110	19
W20	3.3	120	21
M18	3.7	140	23
M20	4.0	150	25

Distance measured along the ideal line.

Terrain

The sprint course, located on a gently sloping southeast-facing hillside, is a sparsely developed residential area with many neighborhood streets, roads, and small paths. It includes an older, smaller part of the village centered around the church, as well as larger areas with vacation homes, residential houses, and some commercial establishments. The village's character is broken up by small, wooded areas, grasslands, and parks, and is dotted with numerous stones and boulders left over from the 1910 landslide. Moderate car traffic is to be expected on the neighborhood streets.

Special information

Contrary to bulletin 3 there will be no map from quarantine to the pre-start. The route will be signed.

Long Distance

Course data

Category	Distance	Altitude	Controls	Start
W18	8.3	220	23	1
W20	9.2	360	23	1
M18	9.7	360	33	1
M20	12.0	470	26	1

Terrain

The course, which slopes mostly toward the north, is extremely varied and features fast, easily runnable alpine meadows interspersed with hayfields, challenging rocky areas, and detailed forest sections. Spacious pasturelands with striking rock formations provide interesting and sometimes surprising control point locations. Steep stream ravines and deep ditches alternate with gentle, ultra-fast alpine meadows, requiring runners to adapt their pace to the terrain. In some places, the terrain is crisscrossed by alpine access roads, trails, and chairlift and ski lift lines. Route choices are crucial and, depending on the variant, may involve additional elevation gain. In good weather, fantastic views of the surrounding mountains also open up.

Map format

All maps are in the format A4 and printed on waterproof paper.

Toilets

Relay: There are two Toi-Toi at the start-/finish area.

Sprint: There are three Toi-Toi and one Urinal at the quarantine. There are no toilets at the start.

Long Distance: There are toilets at the mountain railway station and two additional Toi-Tio immediately after leaving the mountain station. Please be aware that no Dobb-Spikes are allowed within the mountain railway station. There are no Toi-Toi at the start.

Live Results

Live results for the Relay on Friday will be published on <https://www.live.srpoz.ch/>. On Saturday and Sunday as mentioned in the previous bulletin on <https://www.o-re-sults.ch>.

Jury

The competition jury consists of Arttu Syrjäläinen (Finland), Simon Leroy (France) and Judith Bell (Great Britain).

Antidoping

Doping is strictly forbidden, and the organizers are dedicated to supporting the Anti-Doping authorities in their work. Doping controls may be carried out at any time during the competitions in accordance with the procedures described in the WADA International Standard of Testing and Investigations. The IOF Anti-Doping rules and the World Anti-Doping Code 2026 apply as of 1st of January 2026. Athletes who are selected for

doping control must bring an official identification (with photo) to the doping test area. The athlete should also bring along their therapeutic use exemption (TUE) if applicable. In general, it is advisable that athletes bring along their ID to all competitions and events. For more information, please consult: [Anti-Doping | International Orienteering Federation](#)

Parking

Parking on Friday: as mentioned in the previous bulletin 3.

Parking on Saturday: Next to the event center. Please follow the instructions of the parking attendants. Please show your parking card.

Parking on Sunday: Drop off possible next to the event center. Parking is located approximately 7 min. walking distance from the event center (see map below).

Bib Numbers and Vouchers for Sunday

On Friday, each team will receive an envelope at the information desk containing the bib numbers for the three races, as well as vouchers for Sunday's meal at the competition center. Since the race numbers for the sprint and long-distance races are distinguished only by a logo, they will be placed in separate envelopes labeled "Sprint" or "Long Distance." Please keep these documents in a safe place.

Shower option on Sunday

As stated in the bulletin, there will be no cloakroom and therefore no showers available. This also applies to the two races taking place simultaneously in Sörenberg.

As some of you will be heading straight to the airport after the race on Sunday, we have looked for and found a solution for that day.

All athletes can shower at the Sörenberg Hallenbad (= public indoor swimming pool) after the race. The long-distance race number serves as an entry ticket. This must be handed in at the entrance. The swimming pool is approximately 700 metres from the

race centre / car park / awards ceremony venue (Hans-Schallerstrasse 28). A map will be available at the information on Sunday.

The indoor swimming pool normally opens at 1.00 pm, but they are opening the doors for us at 12.30 pm. We hope this arrangement suits you.

Please do not forget to tell your athletes to bring a towel if they wish to make use of this facility.

Tourists

Depending on the weather, a large influx of tourists is expected in the Sörenberg region on Sunday. Please allow for wait times when taking the cable car to the starting point.
